GND: connect GND	VCC: power supply
SCL: IIC clock line	SDA: IIC data line
Working Voltage: 3.3V/5V	Size: 29.4mm*28.8mm
Digital I2C base address: 0x34	Digital register I2C base address: 0x24

Digital tube module, it integrates the TM1650 chip, can directly drive the digital tube display through I2C, no need to drive it to display through the dynamic scanning of MCU.

The difficulty of using the digital tube is reduced, the CPU occupancy rate of the single-chip microcomputer is saved, and the operation is convenient and flexible.
